Will not cause tack or saddle slippage on horses

Highly concentrated, up to 20:1, but can be used undiluted with no problems

pH balanced for animal's skins.

100% plant-based, NO SULFATES!

Our Competitors

Leukalustre Melaleuca Shampoo, Miracle Corp Melaleuca Shampoo, Equissential Shampoo & Conditioner, etc.

There are many shampoos and conditioners on the market today that contain some form or amount of Tea Tree Oil. In order to be effective, however, the Tea Tree Oil must be in a proper medicinal quality and concentration.

Compare most shampoos by reading the ingredients or by simply smelling the products and one can easily tell the difference between Essential Equine Shampoo and their competitors.

Many, if not most, of the horse and small animal shampoos available today are either harsh (too much sodium laurel sulfate) are thickened with salt, or are not pH balanced so they do not rinse easily.
