

TEA-CLENZ

Product Description and Competitor Comparisons

Essential Equine- TEA-CLENZ® Equine Body Wash

Contains a powerful pharmaceutical anti-fungal/anti-bacterial agent: benzethonium chloride, buffered for pH of horse's skin & hair.

Economical concentrated formula for ease of use.

Extremely effective against ringworm, rain rot, rain scald and other topical fungal and bacterial conditions.

Works within 3 applications and hair regrowth begins in 7-10 days.

Nothing else like it on the commercial market.

Contains Tea Tree Oil.

Can be used to clean & sanitize tack, blankets, brushes, etc.

Our Competitors

Eqyss Spray

Contains triclosan, the ingredient in Dial Soap

Non-concentrated formula

May require multiple applications

Equine Relief (Equine Elite Products)

Many different labeled products that are actually all the same just labeled differently.

Contains only benzyl ammonium chloride, no other active ingredient.

Iodine or Wettable Captan

Messy, caustic, staining.

Requires multiple treatments over a long period of time.

Hair regrowth is retarded after killing topical funguses.
